To use JSP and database connectivity to create Login page for a user.

```
LoginProcess.jsp
1. <%@page import="java.sql.*" errorPage="\MyError.jsp"%>
2. <html>
3. <body>
4. <%
5. Connection con=null;
6. String uname=request.getParameter("uname");
7. String pass=request.getParameter("pass");
8. try
9. {
         Class.forName("sun.jdbc.odbc.JdbcOdbcDriver");
10.
11.
         con=DriverManager.getConnection("jdbc:odbc:DSNLogin");
12.
         Statement st=con.createStatement();
13.
         ResultSet rs=st.executeQuery("select * from Login where uname=""+uname+ ""
    and pass=""+ pass +""");
14.
         if (!rs.next())
15.
         {
16. %>
17.
               User details given for user name : <%=request.getParameter("uname")%>
    and password : <%=request.getParameter("pass")%> are not valid <br/> <a
    href="Login.html">Try again</a>
18.
               </body>
19.
               </html>
20. <%
21.
               return;
22.
23.
         }
         finally
24.
25.
          {
26.
         try
27.
28.
               con.close();
29.
          }catch(Exception e){}
30.
31. %>
32. This is a Home Page <br/>
33. Welcome, <%=uname%>
34. </body>
35. </html>
```

Login.html

```
36. import java.io.PrintWriter;
37. <html>
38. <head>
39. <title>Login</title>
40. <meta charset="UTF-8">
41. <meta name="viewport" content="width=device-width, initial-scale=1.0">
42. </head>
43. <body>
44.
       <form action="LoginProcess.jsp">
       45.
46.
       47.
            Enter Username: 
48.
            <input type="text" name="uname">
49.
       50.
       Enter Password: 
51.
            <input type="password" name="pass">
52.
53.
       54.
       55.
            <input type="submit" value="Login">
56.
57.
       58.
       59.
       </form>
60. </body>
61. </html>
```

OUTPUT

← → C 🗋 localhost:8080/ServelateDemo/LoginProcess.jsp?uname=Jekil&pass=jekil

This is a Home Page Welcome, Jekil
