Prepare a Client-Server application in which client will send a request a string to make it in upper case.

Server.java

```
import java.io.*;
1.
2.
    import java.net.*;
    public class server {
3.
4.
      public static void main(String [] arg)
5.
6.
         try
7.
8.
            ServerSocket ss= new ServerSocket(777);
9.
            Socket s = ss.accept();
10.
            System.out.println("Connection Established..");
            InputStream obj = s.getInputStream();
11.
            BufferedReader br = new BufferedReader(new InputStreamReader(obj));
12.
13.
            String str=br.readLine();
            System.out.println("Client String : "+str);
14.
            String str2=str.toUpperCase();
15.
16.
            OutputStream os = s.getOutputStream();
17.
            PrintStream ps = new PrintStream(os);
18.
            ps.println(str2);
19.
         }
20.
         catch(IOException e)
21.
22.
            System.out.println("Error : "+e.getMessage());
23.
24.
       }
25. }
Client.java
1. import java.net.*;
   import java.io.*;
2.
    public class client {
3.
4.
      public static void main(String [] arg)
5.
6.
         try
7.
8.
            Socket s = new Socket("localhost",777);
9.
            BufferedReader br = new BufferedReader(new InputStreamReader(System.in));
10.
            String str;
11.
            System.out.println("Enter Stirng : ");
12.
            str=br.readLine();
            OutputStream os = s.getOutputStream();
13.
14.
            PrintStream pr = new PrintStream(os);
15.
            pr.println(str);
```

ADVANCE JAVA TECHNOLOGY [Practical :- 7] 2015

```
BufferedReader
                                                                        BufferedReader(new
16.
                                                           new
    InputStreamReader(s.getInputStream()));
17.
           String str2;
18.
           while((str2 = br2.readLine())!=null)
19.
           System.out.println("Server String : "+str2);
20.
21.
         catch(IOException i)
22.
           System.out.println("Error : "+i.getMessage());
23.
24.
25.
      }
26. }
```

OUTPUT

```
Output ×

ipaddress (run) × ipaddress (run) #2 ×

run:
Enter Stirng:
Jekil
Server String: JEKIL
BUILD SUCCESSFUL (total time: 3 seconds)
```

Client

```
Output ×

ipaddress (run) × ipaddress (run) #2 ×

run:
Connection Established..
Client String : Jekil
BUILD SUCCESSFUL (total time: 5 seconds)
```
